

Snap-tite H, IH & PH Series

General Purpose Hydraulic and
Pneumatic Quick Couplings

Many Standard Configurations Suitable for Hydraulic and Pneumatic Applications:

Snap-tite H Series couplings have been proven by years of use on hydraulic and pneumatic applications. H Series is best suited for general purpose fluid applications where either single or double shut-off valving is desired. A wide range of sizes, materials and end configurations are available.

PH version couplers and nipples are valved with a connect-under-pressure feature. These steel couplers and nipples allow connection with H Series valved couplers and nipples when there is residual pressure on the PH coupler/nipple side.

IH version couplers are steel with a cylindrical valve designed specifically for pneumatic use. When paired with an unvalved/plain H Series nipple, it functions as a durable single shut-off connection.

H Series Features:

- Sizes 1/4" - 6"
- Available in steel, brass, aluminum and 316 stainless steel
- Seal material options available
- Optional sleeve lock helps to prevent accidental disconnection
- Double shut-off version has low pressure drop
- Manually operated sleeve provides secure connection
- Couplings made of stainless steel 316 (all sizes) and steel (2-1/2" and above) are PED 2014/68/EU compliant.
(Units with FKM seals operating with temperatures above 120°C have max operating pressure reduced by 50%. See marking "PS" and "TS" stamped on coupling parts.)

ENGINEERING YOUR SUCCESS.

Technical and Dimensional Information

H Series Poppet Valve

H Series couplings are suitable for general purpose applications and a variety of media. They are very versatile in material, size and end configuration. Valve combinations include:

- Double shut-off poppet valves
- Single shut-off (valved coupler / plain nipple)
- Straight through (unvalved/plain)

IH Version Cylindrical Pneumatic Valve

IH version couplers have a cylindrical valve designed specifically for pneumatic systems and reciprocating, pulsating, rotary motion air tools. The IH valve provides 360° contact when connected with an unvalved/plain H Series nipple, enabling efficient operation and long life. Available in steel, sizes 1/4", 3/8", 1/2" and 3/4".

PH Version Connect Under Pressure Poppet Valve

PH version couplers and nipples make it possible to overcome the high connection force caused by residual pressure. The poppet valves have an added pressure relief feature to allow connection under static pressures up to 3000 psi (210 bar). With a PH Series coupler or nipple installed on the pressurized line you can easily connect with a mating valved H Series. Available in steel, sizes 3/8", 1/2", 3/4" and 1".

Working Pressures

Size	Valved on both coupler and nipple (Double Shut-off) Valved on one half and Unvalved/Plain on the other half (Single Shut-off)								Unvalved/Plain on both coupler and nipple (Straight Through)

NOTE: Pressure ratings were established under static pressure conditions. Therefore, pressure ratings for any given flow, pressure surge and/or vibration may vary from these ratings. Burst pressures listed were taken at the point at which failure rendered the quick disconnect inoperative. (Proof pressure equals 1-1/2 times the working pressure; burst pressure equals 2 times working pressure.)

NOTE:

¹ Dimensions taken across the hex flats. Round stock with two milled flats may be substituted for hex stock. Dimensions across flats same as dimensions across hex flats. Max O.D. of round stock will not exceed the dimensions across the points of the hex stock. Valve coupler and nipple bodies may be supplied from round bar stock without wrench flats.

² Notch on hex indicates RP British parallel threads.

Accessories

Dust caps, dust plugs and pressure caps protect disconnected couplers and nipples from damage, dirt and other contaminants. Dust caps and dust plugs are available in plastic and clear anodized aluminum.

Plastic Cap and Plug	Aluminum Dust Caps and Plugs	Pressure Caps
Designed with a loop to fit over fitting or affixing to equipment with a sheet metal screw. Available in sizes 1/4" thru 1".	Aluminum dust caps and plugs are available in sizes 1/4" thru 3". The 1/4" thru 3/4" sizes come with 10" chrome plated brass bead chain. The 1" and above come with steel zinc plated sash chain.	Pressure-tight pressure caps for nipples are standard in steel, Trivalent plated. Other materials such as brass, aluminum and stainless steel available on request. Sizes available 1/4" thru 3". Sizes 1/4" thru 3/4" come with 10" length of corrosion resistant steel cable. Sizes 1" thru 3" come with 12" of cable-all with adjustable loop at end of cable. Consult QCDE for special lengths.

Replacement Parts

Valve Kits	Coupler Interface Seals
Includes valve, valve spring and stop. Valve seal is included in sizes 3/8" thru 1" in brass, steel, stainless steel and aluminum. Part Number – Use the base part number followed by SPK. Example: VHC4-SPK VIHC6-SPK	Includes O-ring and back-up ring. Part Number "H (size)-56-9 (seal material)". Example: H6-56-9A ³
	O-Ring and Back-Up-Ring Current Design

³"A" required for Nitrile Seal Kits. Refer to the part number code for other seal options.
