

Hi-Check Non-Return Valve

up to 10,000 psi/689 bar

Product Description:

These high performance check valves offer the user two options for cold working pressure ratings of Class 2500 and Class 4500, with an opening pressure of 10 psi max.

By offering a true two piece design, body leakage paths are kept to a minimum.

With the added opportunity to select integral compression ends the user can eliminate the use of taper threads and thread sealant. This avoids system contamination, reduces potential leakage paths, weight, space and, therefore, installation costs.

Product Features:

- Two-piece metal seated body design - minimal leakage paths
- 4:1 Pressure boundary designed safety factor
- Designed to meet pressure and temperature requirements of ANSI/ASME B.16.34, as limited by the seat materials
- Nitrile, Fluorocarbon, EPR and Highly Fluorinated Fluorocarbon Rubber seat materials available
- Integral compression ends available
- Factory tested - all units fully hydrostatically tested to 1.5 x max. W.P
- Connector thread environmentally sealed
- NACE MR 01 75/ISO 15156 compliant materials available

Product Benefits:

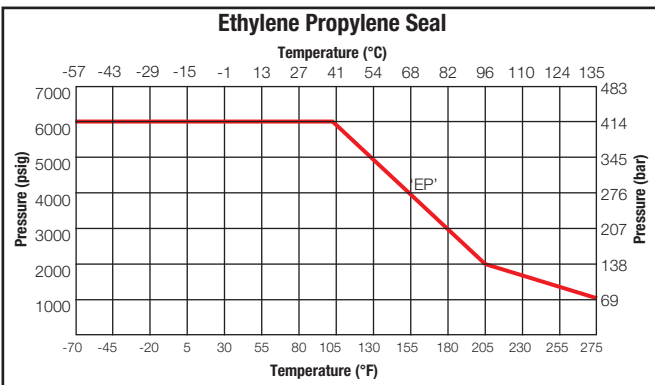

- Self-centering Seal
- Low noise
- Rugged Design - Threads not in contact with media
- Zero coil bounding check spring
- Explosive decompression/Extrusion resistance
- o-rings for High Pressure Applications
- Optional secured Locking Connector
